

SC Remote Features Improved

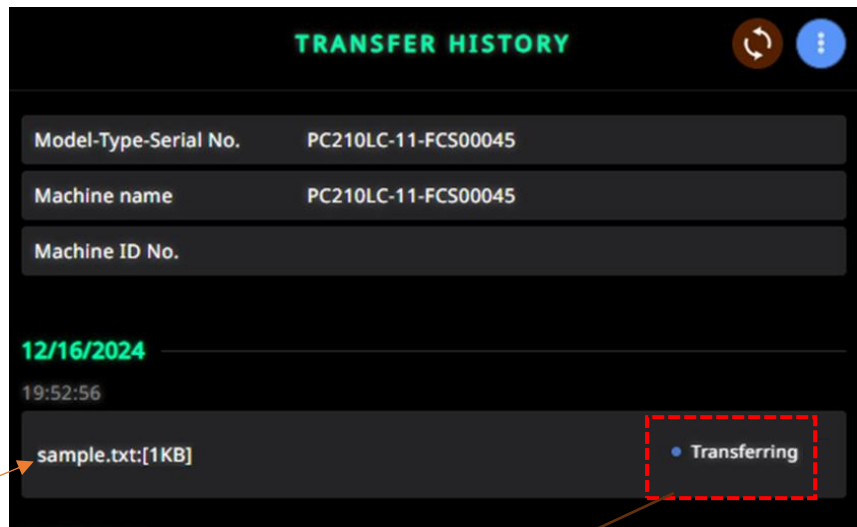

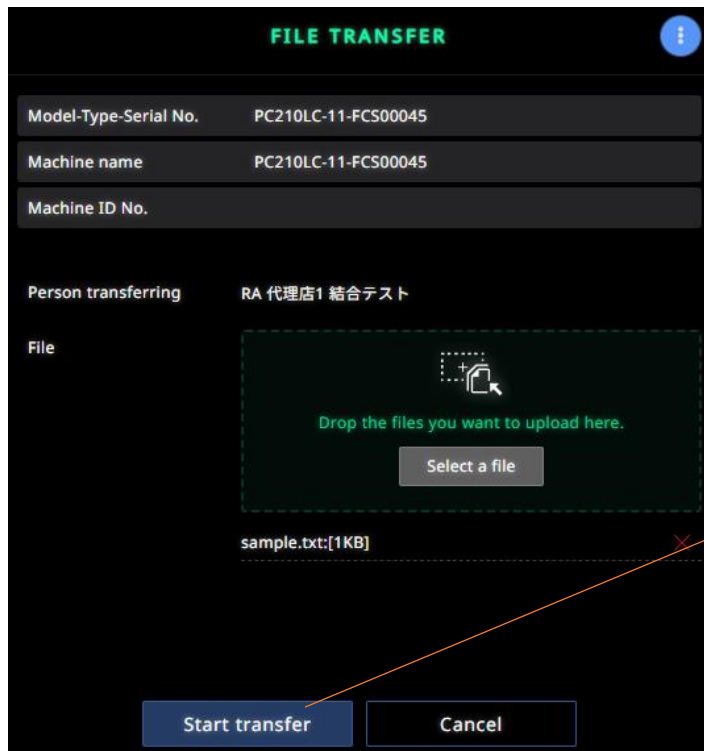

[Released Jan, 2025]

Version 2.23.0

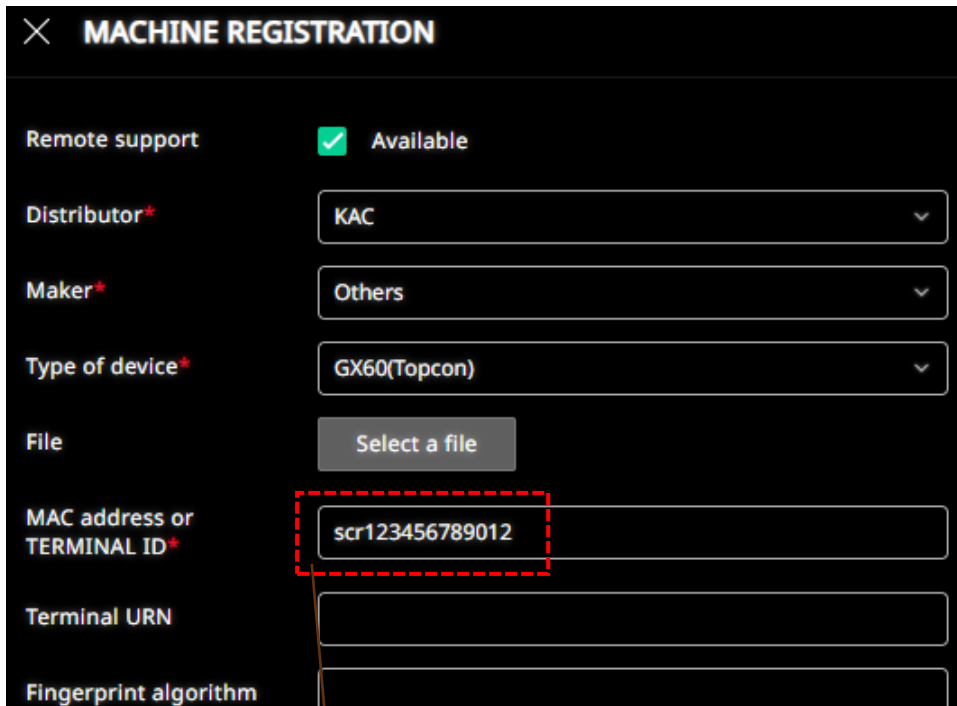

When executing a file transfer on the FILE TRANSFER screen, the processing of the transfer data now begins immediately.

As a result, there will no longer be cases where the machine is online but the transferred file remains in an "Not transferred" state.

On the screen after pressing the transfer start button, "Transferring" will be displayed.

When entering a terminal ID on the MACHINE REGISTRATION screen, the leading three characters “SCR” can now be registered without case sensitivity.

MACHINE REGISTRATION

Remote support Available

Distributor* KAC

Maker* Others

Type of device* GX60(Topcon)

File Select a file

MAC address or TERMINAL ID* scr123456789012

Terminal URN

Fingerprint algorithm

It is now possible to register even if “SCR” is entirely in lowercase.
