

SC Remote Features Improved

[Released July, 2026]

Version 2.30.0

Machine Data Download/Delete now supports multiple folders. **For Komatsu IMC Type 12 machines (IMC 3.0)**, both the Inbox and Outbox folders can be accessed.

What changed: the device file list is now shown per folder (Inbox & Outbox), so files in each folder can be checked, downloaded, and deleted (previously, only a single folder (Inbox) was shown).

Benefit: files sent from SC Remote (stored in Outbox) can now also be checked and deleted.

Files sent from SC Remote (Outbox) can now also be checked & deleted
